

*Larry Louser*

Our NAR RMIC committee has set some important goals for this year-one of which is to increase our participation responds to calls for action. We at NDAR had some good news in 2015 and some not so good news. Good news we were in the top 10% of all states in responds to call to action- the not so good news we were third in our region behind SD & IA. North Dakota was about 37%, SD was just under 50%-AE's I gave Jill & Nancy a thumb drive on ideas to increase our %- if each board were to have a couple members make a few phone calls- it's 2 clicks away from your mouse or phone.
